

## Tips & ideas

# Allergy sufferers and odor sensitives

Every day we are exposed to a variety of environmental chemicals, and often the air pollution in our homes is even greater than outdoors. The constant confrontation of our body with this multitude of polluting substances often leads to an overstress and ultimately to a weakening of our immune system.

As a result, not only allergies are increasing alarmingly. More and more people now also react highly sensitively to odorous substances. Already at the end of the 1980s, LIVOS began manufacturing products that were especially tailored to the high demands of allergy sufferers. In the last few years, LIVOS has been working increasingly on the development of products that also meet the needs of odor-sensitive people as far as possible. Selected LIVOS products, which meet the requirements of allergy sufferers

and odor-sensitive people, are available for almost every application and substrate – from the primer over to the color design and to cleaning and care. The development of the individual products was accompanied by tests with allergy sufferers and odor-sensitive people in cooperation with external institutes.

Further information can be obtained from your LIVOS distributor or directly from LIVOS. You can also use our website [www.livos.co.uk](http://www.livos.co.uk) and our hotline **+49(0)5825 - 88 30**.

Order no.: 1170-11 · as of November 2019

## The right product for every application

### Walls and ceilings (Mineral substrates)

#### Application or result

#### White design

#### For coloring
