

## Tips & ideas

### Solid wood toys

Order no.: 1170-8 · as of January 2023

#### Children grasp the world

Children absorb influences from their environment more intensively than adults – also pollutants. Toys and playground equipment in particular should therefore be free of harmful substances. Therefore, make sure that your purchase is free of toxins!

LIVOS offers oils, paints and stains that provide long-lasting protection for wooden toys and playground equipment – without harmful substances. You can choose between colorless and colored, opaque and transparent coatings.

All LIVOS products for children are saliva and sweat resistant and suitable for toys according to DIN 53 160. Find out more about the craft products of the LIVOS creative series.

Further information can be obtained from your LIVOS distributor or directly from LIVOS. You can also use our website [www.livos.co.uk](http://www.livos.co.uk) and our hotline **+49(0)5825 - 88 30**.
