

## Tips & ideas

# How to make your windows look like new

Ordner no.: 1170-4 · as of November 2019

Windows are central elements of an apartment. In case of wooden windows, one should use a treatment free of harmful substances which allows the water vapor to move, in summer from the outside to the inside, in winter from the inside to the outside. The choice of the coating is also very decisive for the durability in general. Whether transparent or opaque, white or colored, our product range contains everything for your application: from oils for priming, paints and stains to products for cleaning and maintenance – free of harmful substances, eco-friendly and health-friendly. Furthermore, we offer a LIVOS neutral program with odorless products, distinguished by specially selected raw materials, which is particularly suitable for allergy sufferers, odor-sensitive people and people suffering from environmental illnesses.

Further information can be obtained from your LIVOS distributor or directly from LIVOS. You can also use our website [www.livos.co.uk](http://www.livos.co.uk) and our hotline +49(0)5825 - 88 30.

## Processing information

The listed products can be used for both, indoor and outdoor treatment. Please note refer to the instructions in the technical data sheet of the individual products.

The same coating structure inside and outside – this general rule ensures an even moisture transport.
