

Tips & ideas

Stairs and floors

Ordner no: 1170-3 · as of November 2019

Stairs and floors are among the most stressed areas in indoor spaces. Their treatment and maintenance must therefore be adapted to the mechanical loads of the surfaces and the special properties of the respective substrate.

Wooden floors and stairs treated with natural LIVOS oils and waxes are antistatic and thus reduce the dust pollution. Furthermore, we offer a LIVOS neutral program with odorless products, distinguished by specially selected raw materials, which is particularly suitable for allergy sufferers, odor-sensitive people and people suffering from environmental illnesses. Please request the corresponding information.

This flyer will give you an overview of the LIVOS products particularly suitable for stairs and floors and the diverse application possibilities. For treatment options for cork, tiles, cotto, concrete and clay floors, please refer to the respective flyer.

Further information can be obtained from your LIVOS distributor or directly from LIVOS. You can also use our website www.livos.co.uk and our hotline **+49(0)5825 - 88 30**.

Stairs

Anti-slip, hard-wearing surface

KUNOS Natural Floor Sealer No. 241

Pollutants from synthetic paints often lead to allergies and diseases of the immune system. LIVOS is the first industrial manufacturer to offer paints and stains made from natural and health-friendly raw materials, combining the highest quality with the protection of man and nature for more than 45 years. As far as technically possible, we do not use any solvents in the manufacture of LIVOS neutral products, at least no orange oil or essential oils. Your LIVOS distributor or our service team will be pleased to give you further information on the processing of the LIVOS products. Please also refer to the technical data sheets for the individual products.
