

Tips & ideas

The right product for every outdoor application

Sun, rain, heat and cold: Outdoor wood is constantly exposed to many influencing factors and stresses. But with the right paint, the durability of wooden facades, balconies and terraces, window and door frames, fences, sandboxes and wooden playground equipment is practically unlimited.

For more than 40 years now, LIVOS has been using the active ingredients of plants for the production of paints and care products. Benefit from this experience! LIVOS offers products in many colors also for your project!

Further information can be obtained from your LIVOS distributor or directly from LIVOS. You can also use our website www.livos.de and our hotline **+49(0)5825 - 88 30**.

Order no.: 1170-12 - as of November 2019

Processing information

Deciduous and coniferous woods must first be primed. This reduces their absorbency and ensures an optimum adhesion of paints and stains. In addition, a reliable protection against blue stain is achieved with coniferous woods.

Legend:

Proven application examples
