

Product Names

The name LIVOS has been developed from the Celtic language, the translation:

color, gloss, scent, life

Special products deserve special names and in 1981 came up the idea to use terms of the Celts.

Nature was sacred to the Celts and for them the divine power was present in every plant, stone and animal. Appreciation for nature continues to thrive in LIVOS and LIVOS therefore helps to ensure more biodiversity through the use of renewable raw materials and by preserving finite resources.

The products are also designed to provide

- a large reach,
- a maximum longevity,
- an easy maintenance and
- the possibility to renovate.

Like the Celts, LIVOS benefited from a variety of influences and lateral thinkers and continues to evolve.

Each Celtic name has one or more translations and correlates with the purpose. On the following page you will find an overview.
