

Tips & ideas

Solid wood garden furniture

Order no.: 1170-6 - as of November 2019

In the garden and on the terrace, your furniture is exposed to wind and weather, sun and rain for many months – influences that weaken the natural resistance of the wood in the long run and change its appearance.

With the right treatment and maintenance your garden furniture retains its original surface quality and you will be able to enjoy it for many years to come.

Do you prefer matt or shiny, opaque or transparent surfaces? Do you like it colorful or rather discreet? LIVOS offers the right product for every taste and every wood type – from the first coat to cleaning and maintenance. All oils, stains or paints suitable for outdoor use can be used to achieve UV-resistant

surfaces that do not flake off, are long-lasting and easy to renovate. LIVOS products are entirely made from renewable raw materials. All ingredients are fully listed.

Further information can be obtained from your LIVOS distributor or directly from LIVOS. You can also use our website www.livos.de and our hotline **+49(0)5825 - 88 30**.

Legend:

New shine in spring and protection in winter
