GORGO Stone Stain No. 617

Order no. 1268E • Last update: November 2023

Colorful design of stone floors

GORGO Stone Stain No. 617 is a thin-layer stain for finishing and refining surfaces pre-treated with GORGO Natural Concrete Floor Paint No. 607. It increases the durability and at the same time offers countless possibilities for a colorful design.

The stain is applied very thinly with a foam or velour roller, sponge or brush, depending on the motif and the size of the surface to be treated.

For a tile look, first stick the tile pattern to the floor using adhesive tape (possibly in different widths). Then prepare with a roller and finish with a sponge.

If a larger area is to be covered with the stain, either a cloudy effect or a uniform coloration can be achieved. Depending on the room temperature, corrections are possible for 5 to 15 minutes.

GORGO Stone Stain is available in 11 different shades. If the desired color is not included in the standard color selection, the individual colors can be mixed with each other in order to obtain a large color palette.

For further information, please refer to the Technical Data Sheet. This can be found on our website: www.livos.co.uk

Processing note

Ensure good ventilation during and after application. Always be sure to store cleaning cloths, polishing pads, sponges, etc. that are still wet or even slightly moist with GORGO Stone Stain No. 617 in an airtight metal container or in water until their disposal, as there is a danger of spontaneous combustion caused by the plant oil content.

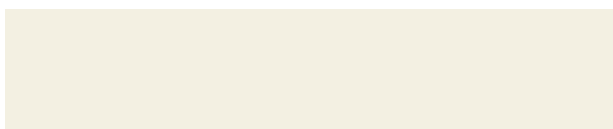

Coverage

First application: 1 undiluted liter (1.06 quart) is sufficient for approximately 15 to 30 m² (161 to 323 ft²), i.e. 44ml/m².
