

Tips & ideas

LIVOS for cork surfaces

Order no.: 1 170-10E · Last update: November 2024

Cork is a sustainable raw material that is obtained from the bark of the cork oak. The bark can be peeled approximately every ten years and grows back. Cork granules, bound with natural resins, form a genuine natural product - sound-insulating, warm to the feet, elastic and easy to clean. LIVOS offers environmentally friendly, healthy products for all steps, from gluing and painting to cleaning and care, so that you can enjoy your cork surfaces for a long time..

With DOMO Universal Adhesive No. 513, based on natural latex and natural resins, cork can be permanently and elastically bonded to the subfloor - even with underfloor heating.

Cork surfaces are usually treated with three coats of a natural resin oil such as ALBANTO Cork Sealer. This oil penetrates deep into the cork and forms a protective, water and dirt-repellent layer. For a more intensive color design, ALBANTO Cork Paint No. 775 can be used as a primer.

Obtain further information from your LIVOS dealer or directly from LIVOS. You can also use our homepage at www.livos.co.uk and our hotline **+49(0)5825 - 88 30**.

Laying

Result

Permanently elastic connection through contact bonding

Treatment

- No. 513 DOMO Natural Universal Adhesive

Coloress treatment

Result

Hard-wearing, water-resistant surface

Treatment

- No. 799 ALBANTO Natural Cork Finish

Colored treatment

Result

Colored cork design and hard-wearing, water-resistant coating

Cream-colored hard-wearing coating

Treatment

- No. 775 ALBANTO Cork Paint as 1st coat and No. 799 ALBANTO Natural Cork Finish as 2nd and 3rd coat

No. 244 KUNOS Natural Oil Sealer (clear) as 1st coat with up to 20% No. 626 MENOS Natural Undercoat and No. 799 ALBANTO Natural Cork Finish as 2nd and 3rd coat

Cleaning & maintenance

Result

Regular low-odour cleaning

For monthly maintenance care

Wax-based refreshment

Oil for maintenance

Treatment

- No. 556 TRENA pH-Neutral Cleaner
- No. 559 GLANOS Natural Liquid Wax Cleaner
- No. 375 BIVOS Oil Wax
- No. 1862 KUNOS Floor Maintenance or initial treatment product

Renovation

Result

Thorough cleaning for heavy soiling

Renewal of worn and damaged wear layers

Treatment

- No. 551 LATIS Intensiv Cleaner
- No. 799 ALBANTO Natural Cork Finish

Harmful substances from synthetic paints pollute our indoor air and often lead to diseases of the immune system and allergic reactions. Healthy interiors therefore require the use of healthy products. LIVOS is the first industrial manufacturer of paints and varnishes made from natural raw materials to offer such products - and has been combining high technical quality with a convincing visual effect, health for the consumer and environmental protection for more than 50 years.
