For dogs, horse & rider and nature lovers

For all those who like to be outdoors

Developed and tested by horse lovers: nutritional supplements for vital horses and dogs, care products for hooves, saddles and boots, insect protection for horses and humans as well as woods-tain and impregnation for fences and stables.

LIVOS COLONY quality

For LIVOS COLONY products we use only natural, renewable raw materials, for example vegetable oils, resins and waxes. Most of these raw materials come from local production. The controlled growing conditions and purity requirements (*DAB [German pharmacopoeia]* and *food quality*) guarantee the outstanding and consistently high tolerability as well as the success in application.

Cleaning and maintaining leather

Cleaning with soap nut extract and coconut soap, **maintaining** with colza oil, wool wax and carnauba wax – the combination of natural raw materials is popular with nature lovers. Leather care with the AMBIS Saddle Soap and the AMBIS Leather Fat as well as the AMBIS Leather Oil for **deep impregnation** of all smooth leather products. Our AMBIS Boot Care is the ideal care product for boots and shoes.

Getting rid of mosquitoes

Finally peace from insects with the COLONY **Insect Protection** made of vegetable and essential oils. It smells pleasantly fresh and offers highly effective protection against a wide range of insects.

Designing and impregnating fences & stables

Prevent browsing, protect against wind and weather and all this in different colors. For paddocks, fences and stables, the **DONNOS Paddock Stain** and the **DONNOS Penetrating Fence Stain** have proved their worth.

Superfood for horses and dogs

Cold pressed linseed flakes (*ready to feed*) from our own production for a **healthy digestion and shiny coat**. Like the entire linseed, linseed cake contains valuable ingredients. The high content of the polyunsaturated omega 3 fatty acid "Alphalinolenic acid", the high-quality vegetable

protein and the valuable mucilages in the seed coat are particularly advantageous. In addition, linseed flakes contain lecithin, vitamin B1, vitamin B2, vitamin B6, vitamin E, folic acid (*vitamin B9*), pantothenic acid (*vitamin B5*), antioxidants, minerals and amino acids such as lysine. Linseed cake thus promotes health in several ways.

Quality-tested linseed cake directly from the producer

The independent laboratory LUFA ITL (*Kiel*) of the AGROLAB GROUP has successfully tested LIVOS COLONY Linseed Cake for nutrients, heavy metals, dioxins, furans, genetic engineering, mycotoxins and pesticides. The independent testing thus guarantees the **best quality**. You can find the results online at www.livos.co.uk.

The linseed cake is made at LIVOS with the help of a traditional linseed oil press. Only high-quality and pure linseed is used, from which linseed oil and linseed cake are obtained as a by-product in a very gentle cold pressing process. Due to their health-promoting properties, the pressed residues – called linseed cake or linseed flakes – are mainly used in animal feed.
