LANON Toy Stain No. 210

Order No.: 1275-1F · Last update: Juni 2019

Protection regardless wind and weather

LANON Toy Stain No. 210 is a hydrophobic and thereby vapor permeable stain on a linseed oil basis. Coatings with this stain reinforce and deepen the natural color of the wood grain and are fast to perspiration and saliva in compliance with DIN 53 160, as well as DIN EN 71 part 3 certified as suitable for toys. LANON is applicable on wooden toys and objects in all 27 color tones for interior usage. Some colors are also suitable for exterior coatings.

The LANON-stain is applicable by the usual techniques such as painting, spraying and dipping. It ought to be applied during dry weather conditions and the air temperature should not be lower than 12°C (53°F). In order to obtain a protection against blue-staining fungi, we recommend priming using ADAO External Primer No. 259. For oak and chestnut use LINUS Penetrating Oak Priming Oil No. 233.

For more information, in particular on the appropriate LIVOS primers, please refer to the Technical Data Sheet which can be found on our website: www.livos.co.uk. Do you need a personal consultation or do you have questions about our products? Then contact us via our hotline: **+49 (0) 5825-8830. Hotline: +49(0)5825-8830.**

Safety Advice

Ensure good ventilation during and after application. Always be sure to store and dispose cleaning cloths, polishing pads, sponges, etc. that are still wet or even slightly moist with LANON Toy Stain No. 210 in an airtight metal container or in water, as there is a danger of combustion caused by plant oil content. The liquid or applied product is not self-ignitable.

Coverage

1liter (1.06 quart): Undiluted is sufficient for 15 - 30 m² (161 - 323 ft²), i.e. 44 ml/m² per coat.

Could be considerably less depending upon the condition and absorbency of the surface.

Our Product-Range

- Wood inside
- Pollutant cleanup
- Wood outside
- Creative design
- Wall decoration
- Odorless
- Cleaning and maintenance
- Colony
