STRUTIVOS Coloring Paste No. 476

Order no.: 1237E · Last update: September 2024

Breathable surfaces

These coloring pastes are suitable for modifying the shades of STRUTIVOS Marble Pit Lime Paint No. 475, especially the white shade. Some color examples can be found on the back. Only lime and alkali-resistant pigments are used. The colored and tinted lime paints are all solvent-free, matt when dry (*given an evenly absorbent substrate*) and wipe-resistant. Due to the high alkalinity, they provide a fungicidal activity and therefore protect the surface from fungi and mold.

These paints are a valuable alternative especially for people allergic to the ingredients of dispersion paints and wall paints.

The full declaration on each package and in the Technical Data Sheets provides a complete information about all the ingredients used.

For further information, please refer to the Technical Data Sheet. This can be found on our website: www.livos.co.uk

Processing note

For tinting, mix the required amount of STRUTIVOS Coloring Paste No. 476 thoroughly with the same or twice the amount of the Lime Paint. Then add this mixture to the Lime Paint and stir thoroughly. A stirring device allows uniform mixing and the ready mixed paint should be examined by a test coat. Color assessment is only possible when the coat has dried.

Coverage

1 liter (1.06 quart): For 6 m² (65 ft²) per coat, i.e. 167 ml/m². Depending on the intended purpose and the desired color intensity: Look at the examples on the color charts. As a full-tone paint depending on the surface. Determine the exact amount needed by doing a test application.
